EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Marc M. Wefers on May 16, 2007.

The application has been amended as follows:

IN THE CLAIMS:

Claims 26, 27, and 85 are amended as follows:

26. (Currently Amended) An article comprising:

a fiber waveguide comprising alternating layers of different materials surrounding a core extending along a longitudinal waveguide axis, wherein the alternating layers define a spiral structure in a cross-sectional plane normal to the longitudinal waveguide axis, and wherein the alternating layers define a radial variation in index of refraction sufficient to guide EM radiation within a first wavelength range along the longitudinal waveguide axis.

27. (Currently Amended) The article of claim ~~[[28]]~~ 26, wherein the spiral structure comprises a multilayer structure comprising at least two layers of the different materials encircling the core multiple times.

85. (Currently Amended) An article comprising:

a fiber waveguide comprising alternating layers of different materials surrounding a core extending along a longitudinal waveguide axis, wherein the alternating layers define a spiral structure in a cross-sectional plane perpendicular to the waveguide axis,

wherein the core is hollow, and

wherein the alternating layers define a radial variation in index of refraction sufficient to guide EM radiation within a first wavelength range along the longitudinal waveguide axis.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: During a telephonic interview with applicant's attorney, Mr. Wefers, on 5/16/07, the examiner stated that the alternating layers defining the spiral structure were different from the prior art in that they included a radial variation in the index of refraction sufficient to guide radiation along the waveguide and that including this limitation in claims 26 and 85 would patentably distinguish the claims over the Atkeisson et al. patent (US Pat. No. 5, 533,161). Thus, an amendment specifying such was agreed to.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Omar Rojas whose telephone number is (571) 272-2357. The examiner can normally be reached on Monday-Friday (11:00AM-7:00PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rodney Bovernick can be reached on (571) 272-2344. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
